

After the Nursing studies (BSN), my first position was in a surgical ward. Then I worked in sterilization department, hemodialysis unit, intensive care unit before working in an open heart surgery operating room of a public hospital. I went back to a special school to obtain my OR Nurse diploma. Then, I worked in sterilization department for two years and after, day shift in orthopedic surgery, traumatology, gynecology, abdominal surgery and Minimally Invasive Surgery. Since almost ten years, I started working only night shift in the same operating room.
